

Chemicals

Be
Chem Safe

With over 5.7 million known chemicals, it is impossible to avoid them - but with the right safety tips, you can prevent them from causing damage.

To ensure the health and safety of yourself and others at your site, make sure you:

- A. Label all chemicals correctly.
- B. Ensure chemicals are disposed of appropriately.
- C. Report all spills, no matter how small.

For other chemical safety tips, read this month's edition of Pilbara Health. If you have any queries regarding chemicals, see your site chemical administrator.
